Dear Ms. Klein,

I am curious why you keep raising the issue of the petition (as you did in the chat of the Task Force meeting tonight) when it has been noted repeatedly that it is the 'act favorably motion; that has been controlling this process since the June 30, 2021 Council meeting. At that meeting the council approved unanimously an 'alternative' if you will to the petition and the petitioners accepted this as a favorable response (by their lack of objection). The petition at the point is irrelevant as I am sure you know.

As Joan Mahaffey pointed out also in the chat tonight there were multiple ways in which the Council altered the request of the petitioners (e.g. the prior vote was not rescinded, the Task Force had a very different composition to the petition requests, etc.)

I look forward to your response.
