

## Interesting article on MoCo history/racism, important historic context

Dear Mayor and Councilors:

This article sheds light on this County's racist past, and historic context for this Town. This is important information in understanding the context within which everyone lived. For example, I did not realize that schools were segregated in this County until after the *Brown v. Board of Education* decision, and even then it was not until the 1960's that all schools were desegregated.

This is not to say that context is right, it is to say a full understanding of historic context is essential to making judgments.
